1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1,4-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Prior art fig 2 in application in view of Nakagawa and Sondermeyer et al .

Prior art fig 2 discloses circuit for providing a bemf signal that represents a bemf voltage induced in a coil of a brushless motor, with an input node operable to receive a tap voltage from coil and network coupled to input node and operable to generate bemf , see #35. Prior art fig 2 lacks removing an offset voltage from the tap voltage and offset voltage is a voltage drop with diode . Nakagawa discloses removing offset voltage from tap voltage, see col 8 lines 55-60 . Sondermeyer et al discloses offset voltage is voltage drop across diode , see co l8 lines 5-10. It would have been obvious to one of ordinary skill in the art to combine the Circuit of Prior art fig 2 with the removing offset voltage of Nakagawa and offset voltage being voltage drop across diode for improved control and high accuracy.

3. Claims 2 & 3 are allowed.

4. In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the

Art Unit: 2837

references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, the subject matter from references taken as a whole would provide removing offset voltage from tap voltage for improved control and high accuracy. The test is what the combined teaching of the references would have suggested to those of ordinary skill in the art.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
